

# RIKO<sup>®</sup> Ceramic Connectors With/Without Fixing Hole

Porcelain is the oldest and most natural material in the world for electrical insulation. It is heat-resistant, non-corrosive, non-inflammable and resistant to various chemicals. These connector blocks are designed to withstand use in high temperature applications and direct connection to very high components (e.g. heating elements) is possible. The max ambient temperature should not exceed 200°C.

**Feature:**

Housing : Porcelain C111, IEC 672-1, Glazed

Insert : Nickel-Plated Brass (Galvanized)

Screw : Zinc-Plated Steel (Galvanized)

**Ceramic Connectors Rectangle with Fixing Hole**
